

3rd Quarter (July - September) 2010 Southern New England Stumpage Price survey comments.

- Good market for low grade up north and saw log markets in RI and CT suck.
- Paid \$20 for 100 cords.
- We need more biomass markets!
- Large inventories of white pine at mills.
- Sugar maple prices getting better, then dropped again...
- Pinetree Power Co (Fitchburg) apparently taking on too many chip delivery vendors, then cutting long time vendors (and new ones) down to two loads a week or some such debilitating low #...where's the loyalty???
- We didn't buy any timber during this period and we didn't do any logging either due to the poor market conditions.
