

Southern New England Stumpage Price Survey comments.

Second Quarter, 2011

1. Scary!
2. New anti-biomass/anti-forestry regulations will cripple the forestry sector.
3. Work in agriculture is still dealing with the rising costs that befall us (still in business).
4. Pallet timber selling as firewood; pending potential glut of ash on market as EAB moves east.
5. Lack of chip markets becoming a problem. DCR/WSP won't be putting out timber sales for at least 8 months.
6. Pretty depressing when compared to just 5-6 years ago. Poor housing management continuing to keep prices low.
7. The only stumpage I bought was in Vermont. Thanks for sending me the stumpage info!
