

Southern New England Stumpage Price Report. 4th quarter, 2014 comments

- Hardwood continues to increase in price, pine not so much. Log length firewood increased greatly just as seasoned, cut, split and delivered. Firewood is scarce and prices going up as fuel oil goes down.
- Most log prices are up and the demand seems to be strong. This is a good thing.
- Pine price not moved in 5 years but grading has really tightened up. Mills culling large amount of logs.
-
